---

Jay,

Attached are the cert decision documents for GM and Ford. These can be found on the following DC network drive: G:\OMS\_CPG\Cert decision document. The G drive is DCCX100-OAR01. I'll see about getting you access if you can't already map it.

Also, I chatted with Greg about the Cummins urban bus family and it was as I thought. The family was previously certified as a HHDDE with a reduced useful life. It can now be certified as a MHDDE and used in an urban bus.

Thanks,

Justin
